

Hello. My name is Emil Sandström and I am 26 years old.

Education:

I have completed a 3 year higher education preparatory programme (Humanities programme, Languages), at Tibble Gymnasium (Täby, Stockholm). There were 2 languages required to pick for this programme. The ones I picked were Italian and German.

Experience:

- 6 months of work-training at ReUnik Täby
- 3 weeks of summer work for Vallentuna county
- 2 weeks of work experience at Lekit (currently Lekia) (retailer, toys).
- 2 weeks of work experience at K-Rauta in Arninge (retailer, building materials)

About me:

As a person I am very calm and do not make a lot of noise. I also have autism. This comes with challenges socially, but also means that I often have a different view of things than others that allow me to be an asset in other ways, by giving a different point of view on problems that others may not necessarily have thought of.

This diagnosis means that you as an employer can receive a salary subsidy to hire me, which means that part of the salary that I would receive from you, is instead paid by the government (arbetsförmedlingen in Sweden).

I hope I am an interesting candidate to work with you and look forward to starting to work and stepping into working life.

I am happy to tell you more about myself if you choose to contact me.
